

A man with a beard, wearing a dark blue t-shirt, khaki work pants, blue safety glasses, and blue earmuffs, is leaning over a large industrial planer. He is guiding a long wooden plank through the machine. The background is a workshop with wooden walls and various materials. The overall image has a yellow tint.

# Hammer®

**A3 26 – A3 31 – A3 41**

Sensational  
planing results at the best value

# A3 – sensational results at an unbeatable price, only with Hammer !

Solid wood

Solid cast iron planing tables, automatic planer knife cutterblock and many more excellent details are the perfect components for sensational jointing and planing results with the A3. In addition to the impressive machine technology, the A3 also offers an unparalleled price-performance ratio – see for yourself!

The self-setting planing cutterblock which enables an incredibly quick change of the knives, provides planing results with which you will be amazed. For mortising or doweling you can equip your planer/thicknesser with the horizontal mortiser.

Variations 3

## Variations

Models & Your Advantages

### A3 26

- » Planing width:  $10\frac{15}{64}$ " (260 mm)
- » Planer table length:  $44\frac{3}{32}$ " (1,120 mm)  $75\frac{19}{32}$ " (1,920 mm)
- » Cutterblock: self-aligning planer knives; Silent-Power® spiral cutterblock (option)
- » Jointing height: 4–225 mm
- » Feed speed: 6 m/min

### A3 31

- » Planing width  $12\frac{13}{64}$ " (310 mm) or other way round  $12\frac{13}{64}$ " (310 mm) planing width
- » Planer table length:  $55\frac{1}{8}$ " (1,400 mm)  $86\frac{39}{64}$ " (2,200 mm)
- » Cutterblock: self-aligning planer knives; Silent-Power® spiral cutterblock (option)
- » Jointing height: 4–225 mm
- » Feed speed: 6 m/min

### A3 41

- » Planing width  $16\frac{9}{64}$ " (410 mm)
- » Planer table length:  $70\frac{55}{64}$ " (1,800 mm)  $102\frac{23}{64}$ " (2,600 mm)
- » Cutterblock: self-aligning planer knives; Silent-Power® spiral cutterblock (option)
- » Jointing height: 4–225 mm
- » Feed speed: 6 m/min

# The most important highlights at a glance

**Hammer® Highlight**

## On request: Sensational quiet planing with the Silent-Power® spiral cutterblock

Exclusive for planer/thicknesser from the Felder Group  
The Silent-Power® spiral blade cutterblock cuts noise levels during planing by well over half and provides a continuous pulling cut for tear-free planing patterns in any type of wood. With this revolutionary new development from Felder you are obtaining all of the advantages of a spiral cutterblock at considerably lower operating, investment and adjustment costs. The benefits of the Silent-Power® spiral cutterblock at a glance...

- » Sensationally quiet, noise emissions halved
- » Blade life up to 20 times longer
- » Four highly precise cutting edges on each knife

**Hammer® Highlight**

## Solid planer tables for absolute precision

The strong ribbed Hammer planer and jointer tables are made from solid cast iron and ensure perfect precision in every situation. The width of the planing table equates to the planing width, which means that workpieces can be planed safely across the full length of the planing table.

**Hammer® Highlight**

## Dual lifting planer tables - 0°- end position saves valuable working space

A space saving solution with optimum ergonomics: Planer tables tilt away from the user operating area, this ensures that working with your Hammer planer is as user-friendly as possible and also requires less workshop space. The simultaneous, dual opening and closing of the planing tables saves time and is extremely comfortable. The planing tables lock automatically at the 0° end position.

# Hammer®

## Hammer - Decision making reliability for many years to come

Durability, functionality and reliability made in Austria – Hammer woodworking machines are top-quality products from Felder. Since 1997, Hammer has been producing high-quality yet affordable woodworking machines for the skilled trades and crafts. The models have been specifically designed for this customer group and are available in the basic, winner and perform configuration, offering price optimised solutions for every

requirement. Decades of experience building machines, Austrian craftsmanship, strict quality standards and tried and tested Felder system solutions, guarantee excellent woodworking machines, the best operating results and customer satisfaction for years to come. From the passionate woodworker to the business user with high demands, with machines from Hammer you are guaranteed reliability and precise woodworking.

## ... why you should decide on a Hammer machine now:

- |   |                                      |
|---|--------------------------------------|
| » Excellent value for money   | » User friendly                      |
| » Decision making reliability for many years to come                    | » Classic design                     |
| » State of the art machine technology                                   | » Quality and precision from AUSTRIA |
| » Solid cast iron tables and units                                      | » Compact functionality              |
| » High quality, unique detail solutions as part of the standard package | » Mobile as an option                |
| » Top quality manufacturing with strict quality guidelines              | » Minimal space requirement          |
|   | » Quickest changeover times          |

# Details that convince

## 3 knife quick-change, self-setting cutterblock system, the heart of every Hammer planer

The Hammer 3-knife automatic cutterblock guarantees excellent planed wood surfaces and the simplest of operating comfort. Since 1987 the cutterblock quick-change system has proven itself a thousand times over and our customers worldwide have saved on expensive additional investment in standard planer cutterblocks. The quick-change cutterblock system is only available from the Felder Group! Your advantages at a glance:

- » Planer knife change without adjustments in seconds
- » Disposable knives, each with 2 cutting edges at an inexpensive price
- » No expensive adjustment tools, like those used for standard planing knives, are necessary
- » No second set of planing knives are required during the sharpening cycle

# Hammer®

## Silent-Power®

The quiet cutterblock

Exclusively only with  
Felder®, Format4®

and **Hammer®**

### INCREDIBLY QUIET

For the sake of your health and your employees. The Silent-Power spiral blade cutterblock reduces noise levels by 50 % (10 db A) when compared with conventional systems.

### 20 TIMES LONGER BLADE LIFE

saves money. The tungsten carbide cutters in the Silent-Power spiral blade cutterblock provide up to twenty times the cutting edge service life of HSS cutters.

### FOUR CUTTING EDGES

More „planer knives“ at the same price. Each tungsten carbide knife (on the Silent-Power spiral blade cutterblock) has four cutting bevels. Quickest change of the cutter with a simple single „turn“.

### LOWER POWER CONSUMPTION

save power costs. Regardless of the planing width, the Silent-Power cutterblock uses significantly less power than comparable systems.

### TEAR-FREE PLANING RESULTS

Real spiral-knife technology. Continuous, pulling cut thanks to the compact arrangement of all cutting edges with optimised cutting angle on the Silent-Power spiral blade cutterblock.

### LARGE CHIP SPACE

smallest chipping volumes. The chipping flow optimised chip clearance of the Silent-Power spiral blade cutterblock and the short cutting bevels guarantee the best possible chip transport and the lowest chip volumes.

### IN-HOUSE PRODUCTION

Innovation made in Austria. The Silent-Power spiral blade cutterblock is manufactured 100% in the factory in Hall i. T., Austria. Local craftsmanship and uncompromising manufacturing standards guarantee the top quality „Made in Austria“.

### PATENTED SINCE 2012

Often copied, but never equalled. Almost 10 years ago, the Silent-Power spiral blade cutterblock has set new standards on the market in terms of noise reduction, quality and efficiency and remains unparalleled to this day.

### Solid planer tables for absolute precision

The strong ribbed Hammer planer and jointer tables are made from solid cast iron and ensure perfect precision in every situation. The width of the planing table equates to the planing width, which means that workpieces can be planed safely across the full length of the planing table.

### Quick and simple: Depth of cut adjustment when planing

The large adjustment handle for the planing depth of cut is integrated perfectly into the machine design. The depth of cut adjustment of up to 4 mm can be carried out quickly, simple and precisely without having to release any locks. That is top class operating comfort.

### The planer fence for exact joining and bevelling

The planer fence can be moved and fixed to any position across the width of the table. The planing fence is made of aluminium and can be tilted and fixed at any position between 90°–45°. Fine adjustable end stops ensure an exact 90° and 45° position. The precise workpiece guiding whilst joining and bevelling is helped by the long planing fence.

# Hammer®

### As and when required: Adapt the table size to the workpiece dimensions

Processing long and heavy workpieces without assistance - no problem with a Hammer! The Hammer table extension system, which has been tried and tested worldwide a thousand times over, allows you to assemble table extensions without tools in just a few steps. The support surface can be extended by  $15\frac{3}{4}"$  or  $31\frac{1}{2}"$  (400 or 800 mm) on each side of the working table. This means an extension of your table length by up to  $62\frac{63}{64}"$  (1,600 mm)!

### Dual lifting planer tables - 0°- end position saves valuable working space

A space saving solution with optimum ergonomics: Planer tables tilt away from the user operating area, this ensures that working with your Hammer planer is as user-friendly as possible and also requires less workshop space. The simultaneous, dual opening and closing of the planing tables saves time and is extremely comfortable. The planing tables lock automatically at the 0° end position.

**Maximum jointing height for large dimensioned requirements**  
The maximum jointing height of 8<sup>55</sup>/<sub>64</sub>" (225 mm) is a guarantee for the perfect processing of large and heavy workpieces. An even more precise, tenth of a millimeter, accurate adjustment of the jointing height is possible with the optional handwheel and integrated digital clock.

**Perfect extraction technology - a clean solution**  
The aerodynamically optimized construction of the dust extraction hood with its ample chip space guarantees an ideal chip extraction and clean working surface.

**The Mortising Unit**  
The mortising unit is mounted to the planer side.

**Minimal space requirement - mobile in every workshop**  
Hammer woodworking machines are an absolute spacial wonder. The efficient machine design of a Hammer means that space can be found in even the smallest of workshops. As an option a rolling carriage can be fitted to every Hammer, offering mobility and freeing up additional space.
